

EQUIPMENT LIST

With an emphasis on individual work and development, GMHA requires all clinic participants to have their own stable supplies. Each horse must also have its own grooming tools and tack.

Riders must wear an approved ASTM/SEI helmet at all times when mounted. Riders must wear breeches, jodphurs, boots or legitimate "riding sneakers" when riding. No riding will be allowed without proper dress. Hiking boots and chaps may not be worn when riding.

Leather sneakers, "Bean Boots" or other leather work boots are permitted in the barn area. For safety reasons, no cotton or nylon sneakers or other casual shoes will be permitted while working in the barn areas.

All items on the following list are important and required for participants' safety and their horses' well-being. Please make sure that all tack items are properly fitted and in good working order. Please check the condition of all stitching and leather, and make sure that all equipment is clearly marked with your name.

EQUIPMENT FOR THE RIDER

- | | | |
|---|---|--|
| <input type="checkbox"/> Hard Hat – ASTM/SEI approved | <input type="checkbox"/> Personal clothing | <input type="checkbox"/> Riding coat |
